TEL.: (+49) 15757919514

E-MAIL: manish.sihulia@gmail.com **NUREMBERG, GERMANY**

Summary

Business Intelligence Developer with 5 years of experience in data analytics, dashboard development, and enterprise reporting solutions. Proven expertise in Power BI, SQL, and data integration, with a strong track record of transforming complex business requirements into actionable insights. Skilled in developing and optimizing reporting solutions that drive business decision-making. Available immediately and willing to relocate to Bad Neustadt an der Saale.

Technical Expertise

BI & Analytics

- **Power BI:** Advanced DAX, Power Query (M), report development, dashboard optimization
- **Analytics Tools:** Experienced in multiple BI platforms, quick learner for tools like Jedox
- **Reporting:** KPI dashboards, interactive visualizations, automated reporting solutions
- **Data Modeling:** Star schema, dimensional modeling, metrics design

Data Management & Integration

- **Databases:** MS SQL Server, PostgreSQL, expertise in complex SQL queries and optimization
- **ETL & Data Processing:** SSIS, ETL pipeline design, data quality management
- **Data Sources:** Experience integrating multiple data sources, ensuring data accuracy
- **Performance Optimization:** Query tuning, report performance enhancement

Technical Skills

- **Programming:** T-SQL, Python for data analysis, C# for custom solutions
- **Development:** .NET ecosystem, API integration for data services
- **Tools:** Visual Studio, Azure DevOps, version control (Git)
- **Cloud:** Microsoft Azure services, cloud-based analytics solutions

Professional Experience

Associate Consultant — Mercedes-Benz Research and Development (via Capgemini)

02/2024 – Oct/2025

Role: BI Developer – Automotive Analytics

- Designed and developed comprehensive Power BI dashboards for monitoring business KPIs and operational metrics
- Created and optimized data models and ETL processes for efficient reporting
- Collaborated with business stakeholders to understand requirements and deliver impactful visualizations
- Developed automated data quality checks and monitoring solutions
- Improved dashboard performance by 45% through optimized data modeling and DAX queries
- Implemented real-time monitoring solutions for critical business metrics
- Built end-to-end reporting solutions from data extraction to visualization

Key Achievements:

- Reduced report generation time by 60% through optimized data models
- Automated daily KPI reporting, saving 20+ hours per week of manual work
- Implemented self-service BI solutions for business users

Software Engineer — Chetu Inc.

09/2021 – 02/2024

Role: BI & Analytics Developer – Healthcare

- Led the development of analytics solutions for a multi-tenant healthcare platform
- Designed and implemented ETL processes for complex healthcare data integration
- Created interactive Power BI dashboards for patient care and operational metrics
- Developed SQL stored procedures and views for efficient data access
- Maintained data quality through automated validation processes

Project Highlights:

- Built a comprehensive healthcare analytics platform using Power BI and SQL Server
- Implemented automated data refresh and distribution workflows
- Reduced manual reporting effort by 75% through process automation

Jr. Software Developer — Sanchay Tech Private Limited

01/2021 – 08/2021

Role: BI Developer – ERP Analytics

- Developed and maintained dashboards for ERP system analytics
- Created SQL queries and stored procedures for data extraction
- Built automated reporting solutions for inventory and financial metrics
- Implemented data quality checks and validation procedures

Skills Highlights

- **Dashboard Development:** Power BI, DAX, interactive visualizations
- **Data Analysis:** SQL, data modeling, ETL processes
- **Business Acumen:** Requirements analysis, stakeholder communication
- **Tools & Technologies:** MS SQL Server, SSRS, SSIS, Excel

Education and Training

- 2014–2018 — Bachelor of Technology, Rajasthan Technical University (Kota, India)
- Microsoft Power BI Desktop & Service Certification (In Progress)
- SQL Server Development and Administration (Self-Paced)

Languages

- English — Professional working proficiency
- Deutsch — Beginner (A1 level, actively improving)

Location

Currently in Nuremberg, willing to relocate to Bad Neustadt an der Saale
